

Specification

Product:	TERRAVEST K
Type of substance:	soil stabilizer concentrate
Form:	liquid
Analysis:	polymer-hydrocarbon compound
Effect:	fixation of seed, fertilizer and soil amendments on the surface of the soil a network of long-chained polybutadiene molecules fixes together the soil particles the fixation cover is absolutely water permeable the network is slowly reduced by ultraviolet radiation. the hydrocarbons are declined into carbon dioxide and water
Field of application:	grassing of virgin soils dust binding of fine-grained surfaces
